FAQ:

Q: Nothing shows on TV screen.
-Forget to turn on TV. Turn on it.
-No power for ipazzportcast. Check the light on your iPazzportcast.
 It should be illuminated or blinking.
- USB port in TV does not provide enough current for iPazzPortcast.
 the LED color will be in red. Try the included power adapter
- TV source isn't set to the HDMI port.Check the source options in TV.
- Try to plug iPazzPortcast to the TV directly instead of a HDMI splitter.

Q: Picture and sound are not synchronized when play video?
A: Please put the dongle at the front of TV with included
 HDMI cable to keep it closer with mobile phone and
 connect again; Keep the WiFi router more closer with
 iPazzPort_Cast dongle to get stronger signal.

Q:**Does it support Miracast or Airplay when the WLAN of
 mobile phone is off?**
A: No, should turn on the WLAN to receive the signal
 from iPazzPortcast, even though have not
 connected any WiFi, it works as normal.

Q:**Does it support Netflix/ Hulu/ Youtube TV App?**
A: No. Due to the protocol protection, the content can't
 be displayed.

Q Fail to display online content?
 A: Please make sure the ipazzportcast and your mobile are
 connected with the same WiFi network.
