How to connect with Fire Stick or Fire TV?

1)Connect your device with tv;

2)Find the bluetooth function on Fire Stick/Fire TV and search new device with your remote;
   (Settings-Controllers&Bluetooth Devices-Other Bluetooth Devices-Add Bluetooth Devices)

3)Turn keyboard on, long press FN and Shift key till blue LED flash, then release them;

4) "iPazzPort Bluetooth" signal will display on screen,click it with your remote to get pair, after seconds,
   "Device Connected" display on screen, completed.

Note:
 "iPazzPort Bluetooth" doesn't display on tv screen,check the blue led light on keyboard is still flash;

Click the "iPazzPort Bluetooth" signal and fail to connect,need to remove the existing bluetooth
records on your device and have a try again. (Device only support limited bluetooth connection)

Search "ipazzportfans channel" on youtube to get the video tutorial

FAQ

1.Why fail to connect this keyboard with my devices?
   1)Make sure the keyboard and Fire Stick is in
     effective range;
   2)Make sure the keyboard is not in low voltage.

2.Why lost connection between them?
   1)Charge the keyboard to get enough power;
   2)Pair keyboard with your devices again.

3.**Can keyboard control multiple devices?**
   No, this keyboard only work with one bluetooth device
   at the same time, if connect with another device, the
   previous connection will be lost and need to connect
   them again.

4.APP can't support this keyboard to input text?
   Few APP, such as Hulu/ Hbo Now can't support the
   keyboard text input, because the system is not opened
   for peripheral,only support screen virtual keyboard.
