2.3 How to start:

1) Turn unit on by switching power switch to "on ".

2) charge your keyboard:

when its LED flashes even no any operation on it, that means your

keyboard is in low power capacity. Please charge it by supplied

charging cable, connecting micro end of USB cable to your

keyboard and the other end to usb port of computer , then led will

light be steady on, and go out when it is fully charged.

3 IR learning:

To learn the original code from the other home appliance, take the TV

remote as an example:

3.1.There are two modes available: "AV" or "TV" . If you want to learn

from the TV Remote, please press the TV key and the LED blue light will

flash, and if AV, the LED orange light.

3.2. Press key "set" for about 2 seconds until LED lights solid, which

means a learning mode. Then tap the key you want to copy and

LED will flash one time and then light solid again, which means a

search and pairing state.

3.3. Approach two emitting heads of both your TV remote and keyboard about 10mm, then press the original button on TV remote, and the LED of your tv remote blinks and code value of this button is being sent.

3.4 The LED of the keyboard blinks quickly for 3 times and lights solid, which means this round of learning process is successfully done.

3.5 Repeat 3.2 , 3.3 to program other infrared learning buttons. Pleas note that LED will go out and quit learning mode if no operation within 10 seconds, which means an auto setting save.

3.6. Press the "set" key to save and quit the learning mode at any time or at the end of learning process.

4. Change operation directions:

We may, or exactly, need to use the touchpad horizontally or vertically, you can make it by pressing the key Fn and then click the key "Esc" to change direction of cursor track.

5. Voice:

The device integrates interactive voice technology to support skype, QQ chatting, MSN real-time talking, Google Talking, wireless music and so on. Just hold the button to speak out.

6 .Pair Android4. 0 smart phone/tablet

6.1 First bluetooth pairing

1). Turn on the Bluetooth voice keyboard, Hold BT button till the second LED flash.

2) Navigate to activate bluetooth mode on your phone or tablet to search bluetooth signal around. When the icon "bluetooth iPazzPort " appears, click to connect. Sometimes, you may be asked to input a password (it will show on screen, such as 3849) .
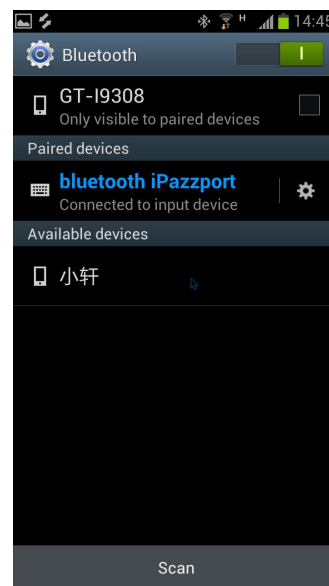

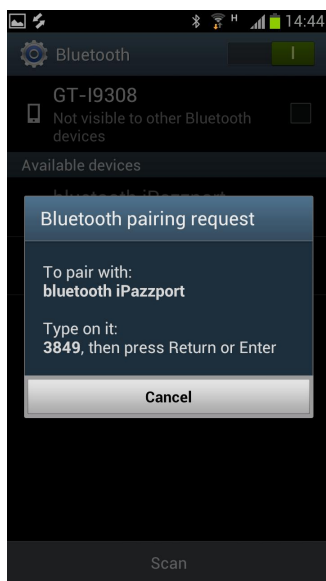

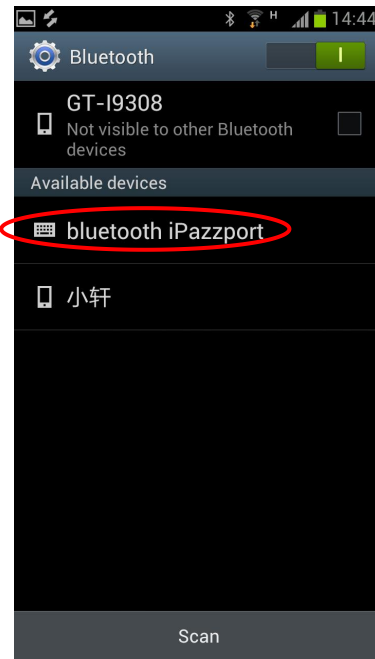

6.2 Voice function:

1) First voice pairing

Hold the voice button on the keyboard for about 5 Seconds, until two LED indicators flash alternately. Find and click the icon " iPazzPortvoice " on Smart phone / tablet to connect. When the fourth LED flashes quickly about 3 seconds and slows down, this connection is successful.

2) Second voice connection

Turn on the keyboard and hold voice button for 3 seconds till the fourth LED lights. The fourth LED flashes quickly about 3 seconds and slows down, which means the connecting is successful.
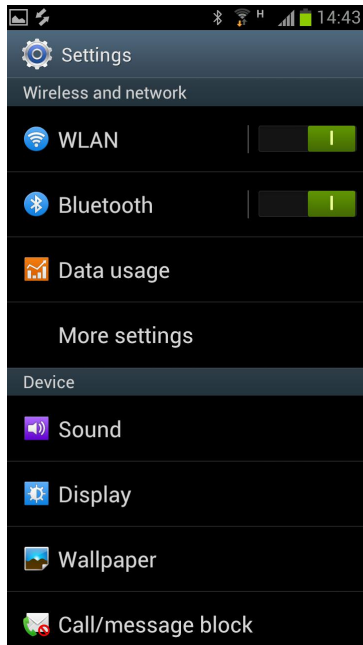

3) Turn off the Bluetooth voice function:

hold the voice button for 3 seconds till the fourth LED lights.

6.3 Pick up call / cut off call by remote keyboard:

Having connected it with this bluetooth keyboard, you can click the sound button on the keyboard to answer the call, and click again to hang up the phone; and hold the sound button for 2 minutes to reject the phone.
